Social Activities

HR Engagement

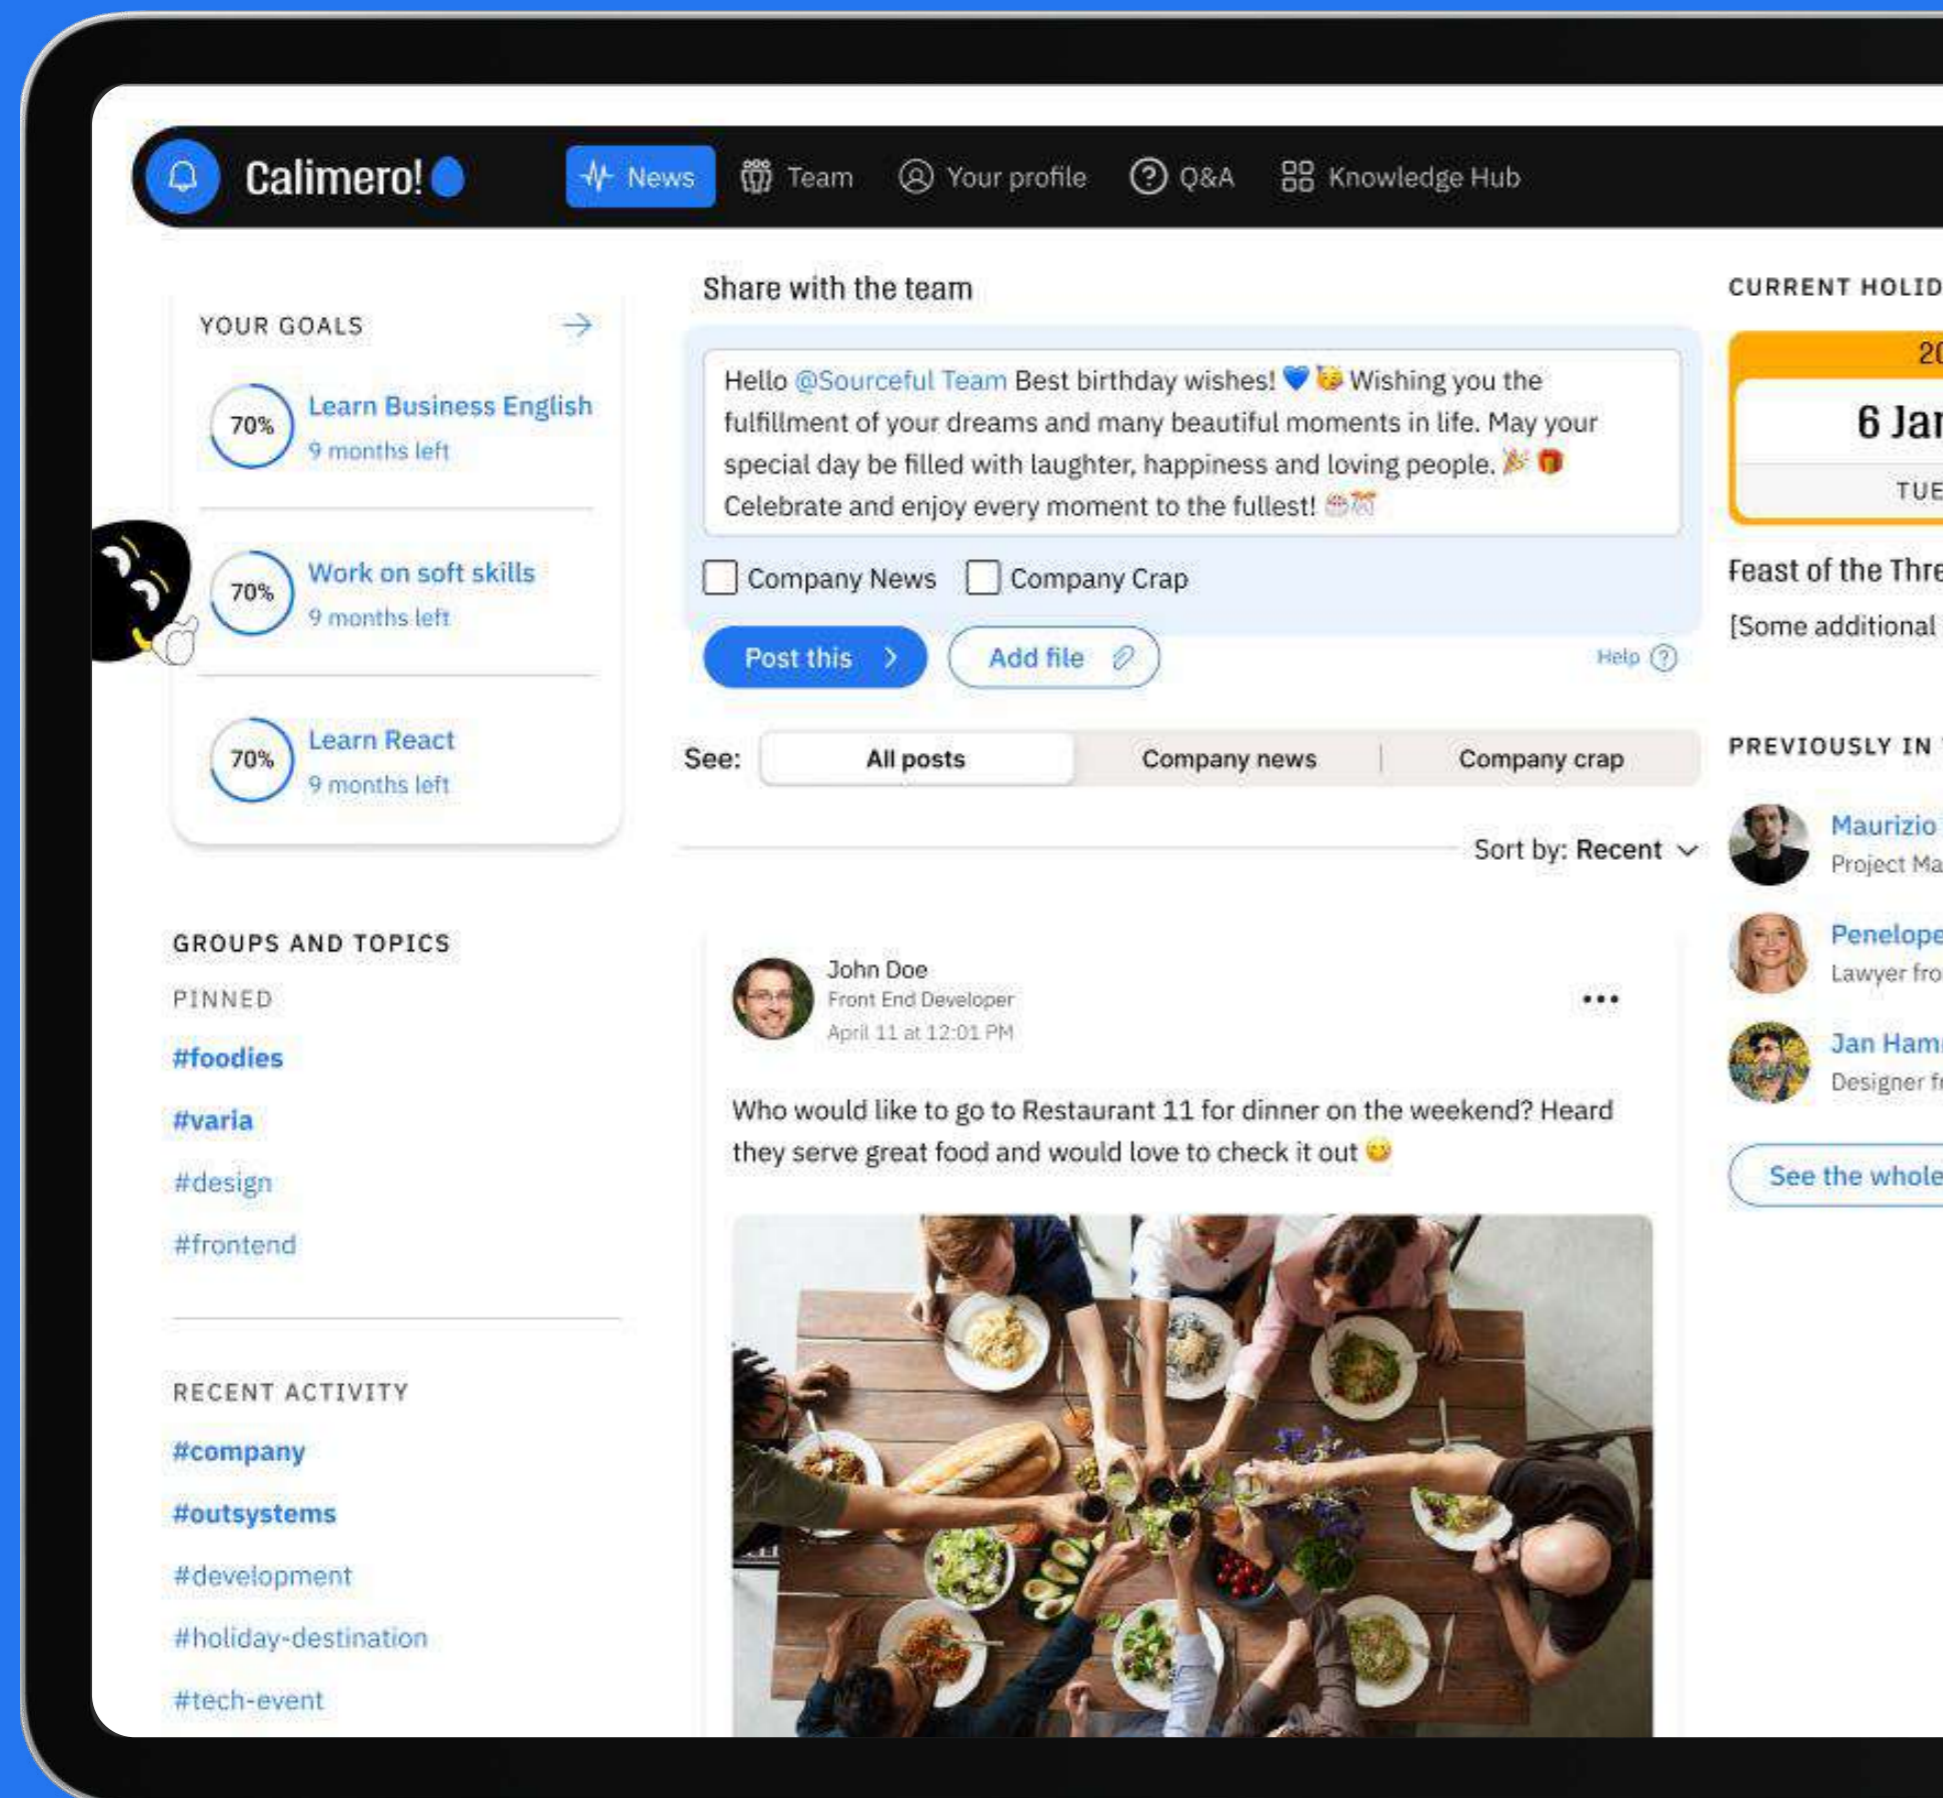

Equipment Management

Break in Service

Collaboration Plan

Invoicing

Learn more about Calimero

Overview of main Calimero Features

1. Applicant Tracking System (ATS)

Calimero's ATS simplifies the recruitment process by enabling companies to manage job postings, applications, and candidate communications efficiently. It offers tools for tracking applicants throughout the hiring pipeline, ensuring no candidate is overlooked.

2. Project Settlement

This feature facilitates the management of project finances and deliverables. It allows teams to monitor budgets, track expenses, and ensure all financial aspects are settled promptly. This transparency helps maintain accountability and optimizes resource allocation.

3. Team Engagement

Calimero enhances team collaboration and engagement through various tools that promote communication and feedback. Features may include project management boards, chat functionalities, and performance tracking, fostering a cohesive work environment and improving overall productivity.

4. Time Log Tracker

The time log tracker enables employees to record their hours worked on various tasks and projects. This feature helps monitor productivity, ensures accurate billing, and provides insights into time management across the organization. Calimero integrates seamlessly with popular project management tools like Azure DevOps and Jira using Chromium web browser extensions.

5. Invoice Management

Calimero's invoice management feature streamlines the billing process, integrating seamlessly with ING Bank's accounting software. It allows for efficient management of invoices related to B2B collaborations and suppliers, with automatic verification through the Time Log Tracker. An AI document reader simplifies invoice uploads and ensures accurate parameter matching, reducing manual errors.
