

COOL DATA MOVER | Lifetime for data

Why stage data?

To perform system tests, reproduce production errors, demonstrate new OutSystems applications and train end-users, you need application data in each environment of your deployment pipeline. Unfortunately, the 'right' data is often missing in non-production environments. Therefore, testers and users often need to enter all data manually over and over again. How can you solve this problem once and for all, while improving the productivity of rapid application development?

Our solution: The new and improved Cool Data Mover

We have developed a unique product to stage application data, our new version has lots of nifty extras. The Cool Data Mover allows you to easily automate the export and import of data between environments. ●

The advantages are:

- Tightly integrated with the OutSystems meta model
- Move data between all OutSystems supported databases
- Supports Cloud and on-premise
- Easily define application datasets to stage
- Single click export, delete and import of data
- Fully GDPR compliant

COOLPROFS | Rapid. Development. Partner

CoolProfs is a leading consultancy company focused on the development of customized information systems. Our approach is fully geared towards the business and spans across the entire lifecycle of information systems. We are an OutSystems Elite Partner and probably have the most OutSystems experience in the Benelux region. We train our people to the highest level in both OutSystems and Agile/Scrum.

We develop, analyze, transfer knowledge, make life easier for our customers and partners and above all, we are innovative. And we love doing this! We currently employ 3 OutSystems MVPs, more than 55 certified developers and years of experience building innovative applications for leading companies in Europe. ●

COOLPROFS

Rapid. Development. Partner.

Rapid. Development. Partner

CoolProfs works for innovative organizations such as Rijk Zwaan, Rainforest Alliance, Kramp, TNO, Randstad, ABN AMRO, Samskip and DB Schenker. And we have a lot of fun doing so. We help our customers develop, analyze their IT infrastructure, use and transfer our knowledge about OutSystems, make the life of our customers and partners easier and above all, we are innovative. And we love doing this!

COOLPROFS SERVICES | Data Migration as a Service

- You provide the data, we provide the migration expertise
- Includes unlimited use of the Cool Data Mover for the migration
- No recurring subscription costs
- Includes on-site support from our migration specialists

CoolProfs offers a unique service in which we take care of all your one-time-only data migration needs. Are you moving your OutSystems platform from the Cloud to an on-premise environment or vice-versa? Do you want to populate a new environment with existing production data or are you changing your database technology and wondering how to get the data across?

The CoolProfs data migration service enables you to leverage the full power of the Cool Data Mover combined with the migration knowledge of our experienced consultants. In a joined effort we will work closely together to map out your migration needs, define the Cool Data Mover Packages and perform the actual migration. We will safely and securely move your data across any OutSystems environment. ●

COOL DATA MOVER | Annual Subscription

The annual subscription of the Cool Data Mover opens up a large number of benefits to your development and business teams. The possibilities are endless: you can provide your development teams with production-like data on a regular basis. This improves the quality of testing and the development of new requirements. You will be able to update your acceptance environment every time you near the acceptance phase, which will give your product owners access to an environment with the latest production-like data. Do you have a training environment? Then you will be able to reload the training data with the press of a button.

All the data handled by the Cool Data Mover can be anonymized to make sure you are fully GDPR compliant.

But these are only a few examples, there are no limitations.

You can use data migrations for all scenarios you can think of. ●

With an annual license you also benefit from:

- Free product updates, CoolProfs will make sure the Cool Data Mover keeps working with new OutSystems releases
- Amazing new features we develop for this product teaser: we're currently developing a scheduling option
- Access to our experts on the services team for support
- Unlimited number of moves
- Move data between an unlimited number of environments within your OutSystems license

Pedro Cardoso, Head Digital Delivery @ OutSystems: "We have been using the Cool Data Mover extensively for 6 months now to move production data, like the Forge and Community forums to our development environments. This gives our developers the unique opportunity to debug and test on real production data. All data is anonymized by the Cool Data Mover in compliance with GDPR. I am the #1 fan"
