RED·DOC

redShift

Do you need an agile platform that gathers all your important documentation?

RED. doc is the corporate solution for document management and process automation that, thanks to its high degree of configurability, enables at low cost an unceasing adaptability to each Customer, their own realities and the organizational changes that might happen. This platform gives great autonomy to our Customers and Partners, simplifying the access to documents and guaranteeing its safety across multiple formats.

"Totally scalable architecture (on-premises/ cloud)
Integration with existing business applications
Extremely adaptive & flexible solution
Integrated Workflow engine
Compliance with the General Data Protection Regulation"
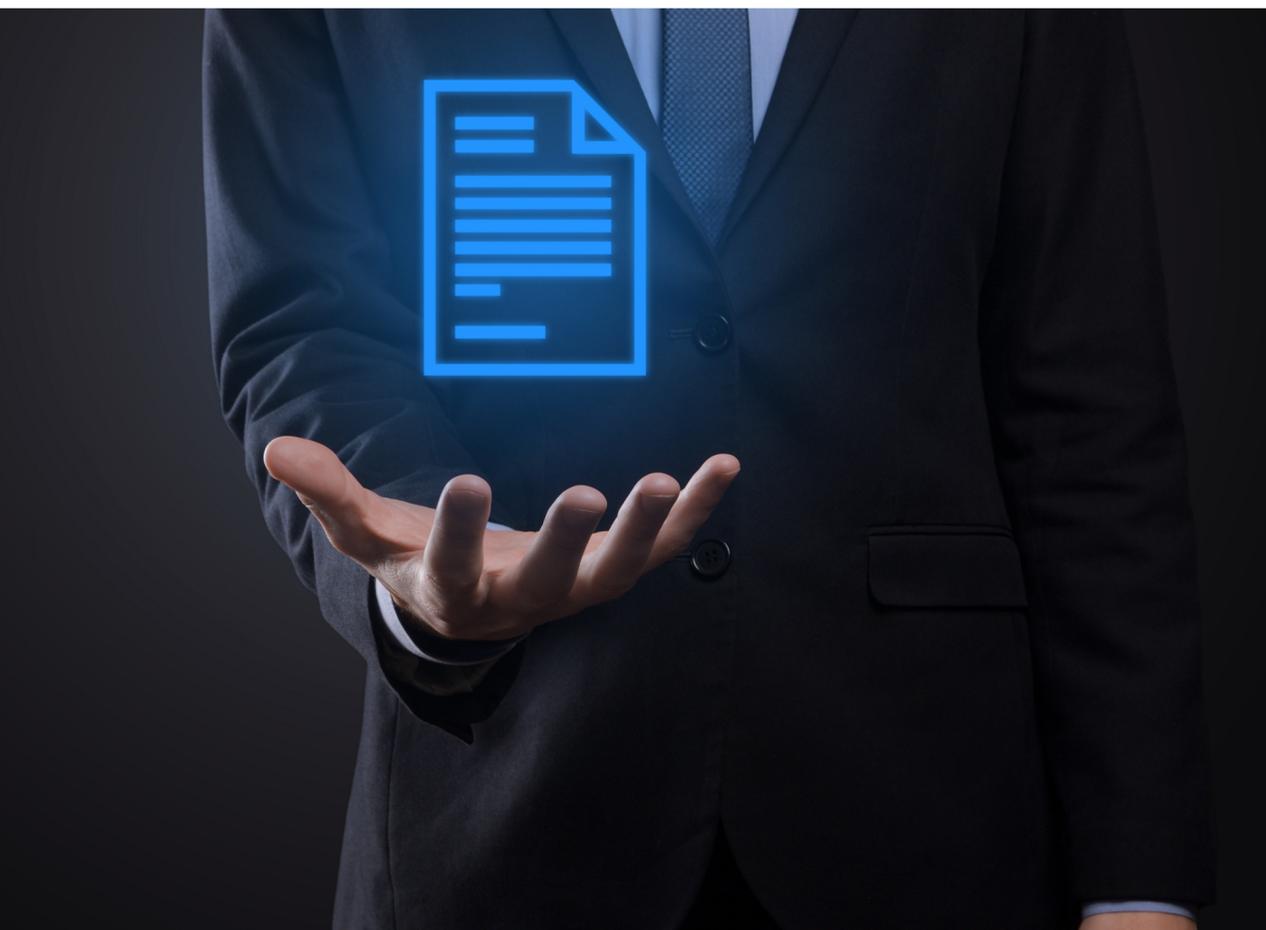

Capture → Analyse → Map → Preserve → Store
