

OMNICHANNEL CUSTOMER SELF-SERVICE

Faster and Better Customer Service, Without Compromises

OutSystems for Customer Experience Transformation

Self-service is the preferred option of both customers and companies for resolving issues. According to [Harvard Business Review](#), 81% of customers across industries attempt to take care of matters themselves before reaching out to a live representative. Yet, less than 9% of customers attempting to self-solve succeed and can fully resolve their issues via self-service channels (Gartner).

The reasons for this failure are multiple: self-service channels are difficult to use, self-service is not optimized for omnichannel nor personalized, and out-of-the-box solutions make it difficult for organizations to deliver the experiences customers expect.

Providing exceptional customer self-service is critical to retain customers and scale customer service without increasing cost of serve. Are you ready to compete?

81% of customers across industries attempt to self-service before reaching out to a live representative.

[HBR](#)

By 2023, more than 60% of all customer service engagements will be delivered via digital and web self-serve channels, up from 23% in 2019.

[Gartner](#)

OutSystems is a low-code app development platform that combines the speed of point solutions with the flexibility and quality of traditional development to create high-quality customized self-service experiences.

Omnichannel customer experiences in a fraction of the time

Quality and security your customers will love

Uniquely yours and tailored to your needs

More customers, same resources, less cost

How Yorkshire Building Society grew mortgage conversion rate by 54% using mobile and web self-service apps

There's an increasing digital dependence among our customer base. We need to make sure that those experiences are seamless and allow people to carry out activities with us as quickly and easily as possible. Using OutSystems has made that much easier.

Kirsty Jordan, Digital Services Lead
