

# Extending SAP with OutSystems

Unlock the value of your SAP applications without disruption

Quickly build web and mobile front ends that provide new, intuitive user experiences for employees, customers or partners. Build the new capabilities you need to stay competitive and optimize your end to end business processes, leveraging your existing development team & skills and without creating technical debt.

By using the power of AI, visual development, and out-of-the-box integrations, OutSystems allows you to build modern applications on top of SAP and integrate with other systems of record at speed.

## SAP Applications Built by Our Customers

## Sales and Marketing

- Personalized Mobile CRM
- Customer and Partner Portals
- Quote to Proposal
- Customer 360
- Field Services Mobile App

## **ERP and Finance**

- Rebate Management
- Claims Workflow and Management
- Contract Management

## Supply Chain Management

- Order Tracking Portal
- PLM Web Portal

Now we have a layer on top of SAP that

Marco Valkenburg IT Manager, Van Ameyde

lets us create client-specific processes and workflows with triggers that update SAP.

- Inventory Management Mobile App
- Retail Stock Inquiry

## Extend and Simplify Access to SAP with Modern Experiences

# Create personalized experiences for every role on any device

Put an end to employee frustration with SAP LoB apps by creating personalized experiences that optimize business processes and make work easier and faster.

Quickly build intuitive apps on top of your SAP LoB applications, and make them available where employees need them most; online or offline with a browser, tablet, smartphone or Progressive Web Application (PWA).

#### Deliver omnichannel experiences for customers and partners by bringing SAP together with other systems of record

Reduce the cost and the complexity of integrating your SAP LoB apps with other systems like Salesforce or Dynamics 365.

Using pre-built connectors and templates, create omnichannel experiences like customer and partner portals and field sales mobile apps.

## Build your applications right with integrated app monitoring, enterprise-grade security and scaling

Monitor, visualize and optimize your SAP LoB applications with OutSystems performance monitoring dashboard.

Take advantage of 200+ automated security checks through deployment and runtime and keep your apps automatically updated with continuous protection from industry identified code vulnerabilities.

## **SB**GLOBAL

## Field Services Mobile App

In just two months with OutSystems, ISB Global delivered remote and field employees the ability to record and monitor customer service requests via mobile and web devices

## estafeta<sup>®</sup>

## **Customer Order Tracking Portal**

In just 11 weeks, Estafeta, one of the largest logistics companies in Mexico, delivered MiEstafeta<sup>™</sup>, a web and mobile-friendly application that allows customers and employees to schedule pickups, track shipments, and access other information.

## Rebate Management Dashboard

Redington Gulf, an IT distributor with a multi-billion-dollar turnover, wanted to keep SAP as vanilla as possible. But they needed a highly customized rebate management solution. By integrating OutSystems with SAP, they achieved the best of both worlds with just three weeks of development.
