COMPLETE OVERVIEW

A dynamic JavaScript task board with drag-and-drop cards, customizable columns, workflows, filtering, and realtime updates for agile planning and team work.

QUICK OVERVIEW

Allow your OutSystems to use an interactive JavaScript task board with drag-and-drop workflow management.

Enhance your OutSystems team efficiency with Bryntum Task Board: interactive JavaScript board with drag-and-drop cards, customizable columns, real-time updates, filtering, and agile workflow management.

KEY FEATURES

Uddan and Bryntum bring you Task Board to:

- Drag-and-drop cards let teams move tasks easily across columns for efficient workflow management.
- Customizable columns adapt the board to any process, team, or project style.
- Real-time updates and filtering ensure all team members stay synchronized and focused.

KEY BENEFITS

Task Board allows you to:

- Improve team efficiency by visualizing tasks and progress clearly.
- Enhance flexibility with boards tailored to any workflow or project.
- Keep teams aligned with real-time updates and easy task tracking.
