

# Terms and Conditions

By applying to an OutSystems Certification exam you are complying with the terms and conditions described in this section. OutSystems reserves the right to change these terms and conditions at its sole discretion.

## Certification Requirements

You agree to comply with the requirements described in the Certification Requirements section of this document for each certification level.

## Certification Duration and Recertification

Your certification never expires, it will be associated with a specific version of OutSystems. For example, you can receive the Associate Web Developer Certification for OutSystems 11, and this will be valid forever.

Certifications will be associated with major release versions. If you want to be certified on the latest version, you must pass the exam for that version.

Due to certifications being version specific, renewals are not needed.

## Fees

You agree to pay the exam fee specified during the registration process. Payment instructions will be sent to you after the registration process is completed. You will not receive your exam results until your payment is received.

## Certified OutSystems Professional's Conduct & Performance

Making false statements on the Application Form can result in losing your certification level or your certification as a whole. In the latter case you'll need to start your certification from the Associate Developer level, if you wish to get certified again.

OutSystems reserves the right to make the necessary diligences in order to investigate inappropriate conduct or performance of a Certified OutSystems Professional, and to apply the sanctions it sees fit, e.g. withdrawing the certification level or the certification as a whole.

## No Shows

If you fail to take your exam before the same gets expired, you will still be charged for your exam. If you have any question or need any assistance please contact us through our website Chat or [training@outsystems.com](mailto:training@outsystems.com).
