

OutSystems Exams Flash Sales Campaign June and July of 2021

Terms and Conditions

- All the exams under this campaign will be proctored by our service provider Prometric
- We recommend that for a better certification experience that exams should be done at Prometric [certified test centers](#)
 - In a Test Center, candidates have access to facilities that are specially designed to deliver OutSystems exams and equipped with all that is needed
 - Proctors observe the test taker during the exam, making sure there are no issues with the equipment, and answering any questions or difficulties quickly and on the spot
 - The Test Center environment provides a more predictable, reliable user-side environment
- When it is not possible to perform the exam in a certified test center, there's also an option of taking the exam in online proctoring. In this case, test takers may face issues due to internet connection stability - all the different operating systems, browsers, plugins, anti-virus software, microphone, and camera setups on test-takers computers add extra risks and decrease online exam delivery reliability. So we strongly recommend testing your machine prior to the exam, following the steps provided by the Appointment Confirmation email received after scheduling the exam. Technical difficulties are the last thing anyone needs when taking an exam.

Good luck!
